Data Managers

BETTERdecisions
finer**QUALITY**care

Our PATIENT ANALYSIS & TRACKING SYSTEM (PATS) is a clinical outcomes, data management software solution that tracks outcomes for virtually any medical procedure or treatment. Robustly able to support multiple and diverse service lines, PATS is your ideal outcomes tracking, and registry participation solution.

PATS helps you stay ahead of ever-evolving medical data requirements with its worry-free data migration and database version management tools.

PATS streamlines your tasks with data integration and export options, registry interoperability, data validation (during entry and submission), leaving you more time for quality patient care.

You can access all of your current and historical data, at all times.
