

# IT Professionals

*"I HELP RUN A MAJOR HOSPITAL'S IT DEPARTMENT. EVEN THOUGH IT IS THE BACKBONE OF MODERN MEDICINE, MY DEPARTMENT IS ALWAYS UNREFUNDED. EVERY TIME I TURN AROUND, THE MEDICAL STAFF IS ASKING ME TO INSTALL AND SUPPORT ANOTHER SPECIALIZED SYSTEM, BUT I DON'T HAVE THE STAFF OR BUDGET TO DEPLOY EVERY DOCTOR'S PET SOFTWARE PROGRAM. NOT ONLY IS IT HARDER TO RETAIN GOOD, SKILLED IT STAFFERS, THE IT MEDICAL COMPUTING REQUIREMENTS (ESPECIALLY WITH HIPAA AND OTHER DATA SECURITY, PRIVACY CONCERNS) ARE BECOMING MORE CHALLENGING."*

## **BETTER** decisions finer **QUALITY** care

PATScLOUD is a fully managed, supremely secure, software as a service (SaaS) solution. We can deploy for any sized need—from single-registry participation to running multiple departments and hospitals. You can access your HIPAA-compliant PATScLOUD from any supported device with internet access.

It's your private cloud, but we manage the setup, software and registry maintenance, backup, recovery—PATScLOUD virtually eliminates your IT support duties.

Our on-premises solution also carries a light footprint. We deliver all your necessary server hardware, software, and other required technology (including your InterSystems Caché database) in a fully-packaged, configured virtual appliance.

## information technology WHAT CAN PATS & AXIS DO FOR ME?

### WE INSTALL IT ALL

We apply all software and security updates, and we import all certified registry updates. We furnish, maintain, and upgrade your hardware and network. We routinely monitor and tune performance. Downtime is

### WE HAVE YOUR BACK(UP)

We encrypt and back up all your PATS data to servers in multiple US regions. This redundancy ensures quick, complete restoration, should disaster strike one region or your facility, directly.

### SECURE, COMPLIANT

Compliance with HIPAA and other data privacy and security mandates are built into PATScLOUD. No data is ever stored on a local device.

### SCALED

We scale your server automatically to accommodate growth, which leads to lower maintenance costs, better user experience, and higher agility.
